Siyuan (Max) Meng

Assistant Professor, Wuhan University of Science and Technology
Ph.D., Civil Engineering (Transportation Engineering), University of Massachusetts Amherst
Email: siyuan_meng_max@163.com | Homepage: siyuanmengmax.github.io
GitHub: siyuanmengmax | Google Scholar: Siyuan (Max) Meng | LinkedIn: Max Siyuan Meng

Academic Appointment

- **Wuhan University of Science and Technology**, Wuhan, China Nov. 2026 – Present
  Assistant Professor, School of Automotive and Transportation Engineering
  Research directions include roadside intelligent perception, transportation safety, infrastructure-centric world models, and transportation system optimization.

Education

- **University of Massachusetts Amherst**, USA Sep. 2023 – Sep. 2026
  Ph.D. in Civil Engineering (Transportation Engineering), Fully Funded GPA: 3.97/4.0
  Advisor: Dr. Chengbo Ai
  Dissertation: *Quality-Aware Multi-LiDAR Framework for Traffic Perception and Safety Analysis*
- **Chang'an University**, China Sep. 2020 – Jul. 2023
  M.S. in Transportation Engineering GPA: 3.66/4.0
  Advisor: Dr. Qiang Bai
  Thesis: *Research on Methodology for Highway Maintenance and Rehabilitation Decision-making Based on Integrated Asset Management*
- **Chang'an University**, China Sep. 2016 – Jul. 2020
  B.S. in Roadway, Bridge, and River-Crossing Engineering GPA: 3.74/4.0
  Thesis: *Comprehensive design of a newly constructed expressway in Jiangsu Province*

Research Profile

My research focuses on **roadside intelligent perception and transportation safety**, including multi-LiDAR and multi-sensor fusion, 3D object detection and tracking, quality-aware traffic conflict analysis, and uncertainty-aware perception. Building on this work, I am developing an **Infrastructure-Centric World Model (I-WM)** research direction that leverages the temporal depth of fixed roadside sensing to support richer traffic-scene representation, reasoning, and decision making. A complementary research thrust studies transportation system optimization under uncertainty, including EV routing, charging, and asset management.

Research Experience

- **Graduate Research Assistant**, UMass Amherst Sep. 2023 – Sep. 2026
  Advisor: Dr. Chengbo Ai. Doctoral research centered on two thrusts:
  - *Quality-aware roadside multi-LiDAR perception and safety:* an end-to-end pipeline spanning background modeling, unsupervised 3D detection, robust multi-point tracking, and quality-aware traffic conflict analysis, with sensor-level reliability propagated through the perception stack.
  - *Transportation system optimization under uncertainty:* robust model predictive control and system-optimal routing/charging methods for electric and mixed autonomous-human transportation systems.
- **Graduate Research Assistant**, Chang'an University Sep. 2020 – Jul. 2023
  Advisor: Dr. Qiang Bai. Developed multi-objective optimization methods for network-level pavement and integrated asset management, addressing segment grouping, traffic dynamics, environmental impacts, and uncertainty.

Teaching Experience

- **Teaching Assistant**, UMass Amherst Sep. 2024 – Jan. 2025
  Course: Programming for Civil Engineers (Python-based).
  - Designed homework assignments and exam problems for an undergraduate Python programming course.
  - Led hands-on lab sessions and guided students through coding and debugging exercises.
  - Graded assignments with detailed feedback and held regular office hours to support student learning.

Patents & Software

1. **Meng, S.**, Ai, C., & Xie, Y. (2026). System and method for unsupervised object detection using multiple LiDAR sensors. U.S. Provisional Patent Application No. 64/085,047, filed June 8, 2026.
2. Bai, Q., Shao, Y., **Meng, S.**, et al. (2025). Deep learning-based automatic detection of illegal vehicles at airport departure levels. Granted Chinese Invention Patent No. CN114821490B [in Chinese].
3. **Meng, S.**, et al. (2023). Airport curbside illegal vehicle monitoring system. Software Copyright [in Chinese].

Honors & Awards

1. Outstanding Graduate Student, Chang'an University (2023)
2. First Prize Scholarship, Chang'an University (2021)
3. Second Prize, English Speech Contest, Northwest China (2021)
4. Excellent Undergraduate Thesis, Chang'an University (2020)

Professional Service

Reviewer for peer-reviewed journals including *IEEE Transactions on Multimedia*, *Journal of Transportation Engineering Part A: Systems*, *Journal of King Saud University Computer and Information Sciences*, *International Journal of Pavement Engineering*, *International Journal of Pavement Research and Technology*, *Transportation Research Record*, and *Cluster Computing*.

Technical Skills

Programming: Python, C++, MATLAB, LaTeX **ML/CV:** PyTorch, TensorFlow, OpenCV, Open3D **Simulation/Robotics:** CARLA, SUMO, RoadRunner, Blender, ROS2, Unity **Other:** GIS, SLAM, optimization modeling, LiDAR point cloud processing
